
a
b
energy distance to target (lower = better)
number of sampling steps (fewer = cheaper)
no crossing
DDIM (η=0)
4× fewer steps
DDPM: 32 steps
quality target
FM: 8 steps
DDPM ancestral
FM
DDIM (η=0) · 8 steps energy = 0.88
DDPM ancestral · 8 steps energy = 0.04
grey = target
FM · 8 steps energy = 0.01
